NHTSA TREAD Act

The Transportation Recall Enhancement, Accountability and Documentation (TREAD) Act was passed in the fall of 2000. The TREAD Act mandated that every new car manufactured for sale in the U.S. after September 1, 2007 must be equipped with sensors that monitor the pressure in all four tires. Sensors installed in the vehicle's wheels send a signal via RF to the vehicle's computer. The computer then processes the sensor data to alert the driver if pressure drops 25% below the specified cold placard pressure for the tire.
